

# Output

T cells are like tiny soldiers inside your body. When bad germs invade, these soldiers rush to the battle, **shooting their special microscopic guns to blast and destroy the germs**. Some T cells are scouts — **they look around and shout, 'Enemy spotted!'** so the other soldiers know where to go. Other T cells are strong fighters — they chase down the germs and stop them from making you sick. And **some T cells are helpers — they cheer on the other soldiers** and make sure everyone wor

## Visualization

## Other Outputs

The Earth's surface is not just one big solid piece. It's more like a giant puzzle made of huge, rocky pieces called tectonic plates. These plates slowly float on top of really hot, soft rock deep inside the Earth. **Earth's plates move like giant armored tanks** — super strong and unstoppable, but they move so

Earth's plates move like giant armored tanks

Uses imagery of war concepts and objects

## Score

5 / 5

## Justification

The explanation can successfully maintain the engagement of the child by using metaphors and personifications, which can help connect the...
